Genesis Coin Token

Genesis Coin (GC) is a revolutionary token based on Binanace Smart Chain (BSC). It is a bep20 token.

The reason behind developing and starting this project is solely for charity purposes. There are many people in the world who are living a very distressed life. We want to help them. People who are homeless, who are suffering from untreatable diseases like cancers, HIV Aids and other people who are physically unfit and need some support, children who have lost their parents and so on.

As a human being, I suppose, I should invest what I can afford for the cause of humanity. All human beings are brothers and sisters. It's our duty to look after the needy.

Introduction

Blockchain technology is rapidly evolving every second and people are getting in like the ocean. After the evolution of Bitcoin we have come through many new coins like Ethereum, Litecoin, Monero etc which are leading blockchain now. Even some coins like Dogecoin which was developed as a joke for mocking bitcoin has been adopted by mass.

In this fast evolving technology and environment Genesis Coin Team has come up with an idea of a token named Genesis Coin (GC) Token. GC will be based on the BSC network and people who will be holding GC will get rewarded in Binance Coin (BNB). Members holding at least 100,000,000,000 (One hundred Billion) GC will get rewarded in BNB every 24 hour.
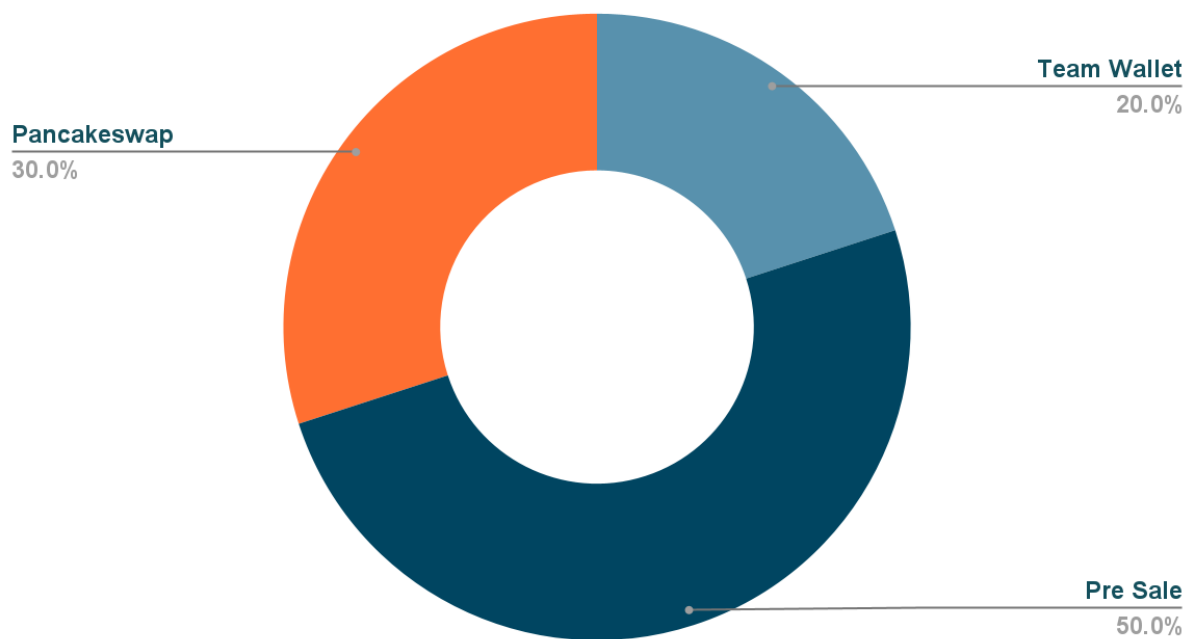

Total supply of GC Token will be 1 quadrillion out of which 20% will be reserved for team wallets (marketing, development, charity and also for burning purposes). 50% of the GC Tokens will be listed for presale.
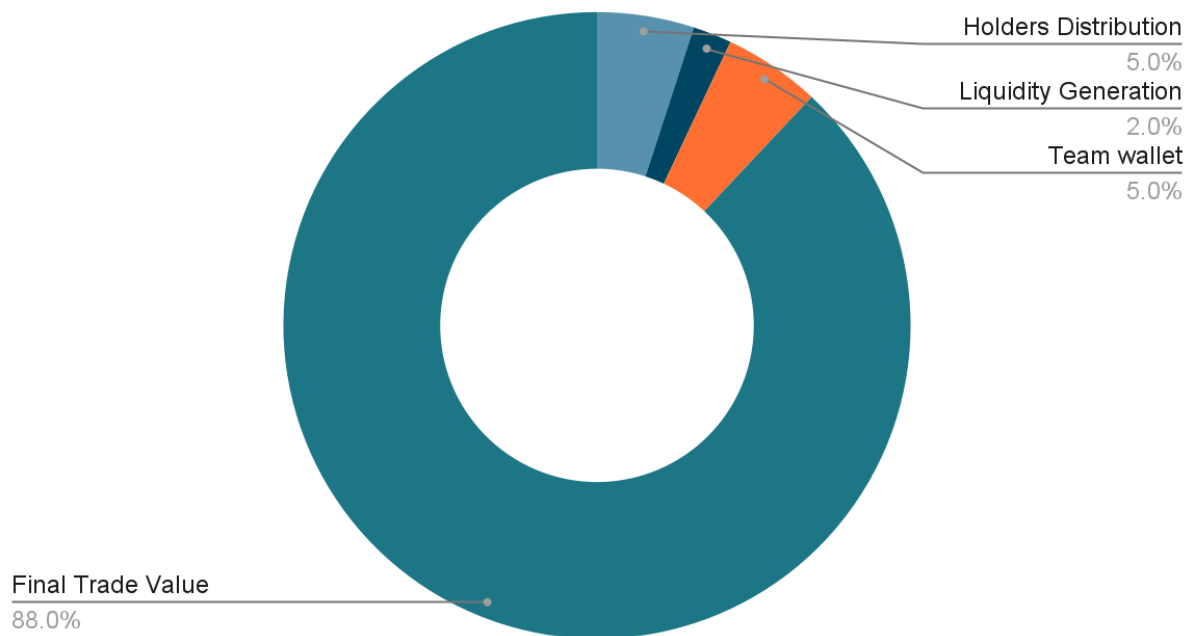

Tokenomics

GC Token has 1 quadrillion total supply. 20% will be reserved in the team wallet which will be used for team build up, marketing, charity, burning and other purposes, 50% is for presale. 70% of the funds generated in presale will be used for liquidity in pancakeswap.

There will be a 12% total tax fee on every trade of GC Token. 5% of the tax fee will be distributed to the community holder in BNB coin, 2% will be used for liquidity generation and 5% will be distributed to the team wallet. Certain amount of funds generated in the team wallet will also be used to buy back the GC Token whenever necessary. Team wallet will also be used for

giveaways, charity, team development, rewarding admins and mods of telegram group and so on.

Tokenomics Breakdown

- Team Wallet 20.0%
- Pre Sale 50.0%
- Pancakeswap 30.0%

Trading Breakdown

- Holders Distribution 5.0%
- Liquidity Generation 2.0%
- Team wallet 5.0%
- Final Trade Value 88.0%

Use Cases

The main idea behind developing this token is to provide charity for people who are in need. People who are economically weak and yet are homeless, suffering from untreatable diseases are in dire need of help. We, the Genesis Team, have decided to launch this crypto project and raise funds to help such people and also benefit the members by increasing the value of the token as we progress.

We do not want to compete with any other project and do not want to challenge others, what we want is to help people in need and grow our community.

Although the token is charity based, we have a full road map to describe the use cases of Genesis Coin Token.

As we grow we will continue to give in charity for the needy people through different international organizations who are working in the fields.

We will build our strong development team and collaborate with other projects to increase the value of our GC Token. GC team will launch projects like Genesis Chart Tool (Web Application), Genesis Swap, Genesis Wallet, Genesis NFT Marketplace and drive towards the Genesis ecosystem and Governance.

Road Map

It has already been cleared about some use cases of the GC Token and the plans of the team to reach its goals. We have created the full road map to reach its goal which will be fulfilled at the specific time. As a community member, every member of the community will have the right to raise questions and guide the team if the team is not fulfilling its goal at every road map.

We believe in transparency and dedication. GC team will remain transparent and will participate in every community raised questions and Ask Me Anything (AMA) session. We will continue to create AMA sessions in voice chat in our telegram group where members will be talking to the development team and all other GC Team members.

Below is the step by step road map of GC Token

- ❖ Phase 1
    - ➢ Building telegram group of Genesis Coin Token (https://t.me/genesistoken_official)
    - ➢ White paper release
    - ➢ Website development and launch (https://genesiscoin.net)
    - ➢ Contract deployment in bsc mainnet
    - ➢ Create presale launchpad and generate funds for listing in pancake swap
    - ➢ Show our presale presence in different crypto platforms like coinsniper

3

- ➢ Listing in pancakeswap for trading
- ➢ Showing our presence in reddit, facebook and twitter (by creating pages and accounts in these platforms)
- ❖ Phase 2
  - ➢ Building strong community of holders
  - ➢ GC Token listing in price-tracking websites like Coin Market Cap (CMC) and Coin Gecko (CG)
  - ➢ Aggressive marketing in different digital platforms like dextools, poocoin, facebook, twitter, google, youtube etc.
  - ➢ Rewarding admin and mods team
- ❖ Phase 3
  - ➢ Continue marketing, building community, rewarding admin, mods and dev teams
  - ➢ Building strong dev teams, interview web developers, app developers and blockchain developers
  - ➢ Collaborating with other projects
  - ➢ Case study for different projects like chart and price tracking websites, wallets, nft marketplace, gamification etc
- ❖ Phase 4
  - ➢ First charity to an international organization working for the betterment of poor and needy people
  - ➢ Case study and initiating the development of web applications and wallet applications
  - ➢ Case study and initiating the development of Genesis Swap
  - ➢ Case study and initiating the development of Genesis Marketplace
- ❖ Phase 5
  - ➢ Initiate listing in different trading platforms
  - ➢ Rewarding community
  - ➢ Rewarding admins and mods
- ❖ Phase 6
  - ➢ Launching Genesis ecosystems (apps, swap, nft marketplace) in test environment
  - ➢ Launching Genesis ecosystem in production environment
  - ➢ Rapid marketing of Genesis ecosystem
  - ➢ Give away, articles, AMAs, prizes, charity, donations etc
- ❖ Phase 7
  - ➢ Extending Genesis ecosystem and preparing for Genesis governance
  - ➢ Case study of gamification
  - ➢ Development team build up for gamification
  - ➢ Case study and initiating development of Genesis Games
  - ➢ Integrating Genesis Games with Genesis Marketplace

❖ Phase 8 and beyond
  ➢ Further research and case study for the possibility of he extension of Genesis ecosystem

Conclusion

We believe that the Genesis Ecosystem will be a great and very successful project. We know that the community is the backbone for uplifting any project or company. This is our vision for the Genesis Coin Token and Genesis ecosystem. Our community will decide our every step through their voting. Genesis charity plus Genesis governance will be the de facto of this community.

GC will be the talk of the town.
